

DEX

www.dexindustries.com

Congratulations on the purchase of a DEXterra Terrazzo product! All DEX products are handmade by skilled artisans and will exhibit characteristics of a product made by human hands. Expect to see variations in texture and color, as well as, a shape consistent with hand cast products. Please review care and maintenance prior to usage. Following these instructions will ensure the products characteristic look, and even a warm patina.

We hope you thoroughly enjoy this premium product. Again, thank you for purchasing from DEX.

Terrazzo Care and Maintenance

DEXterra Terrazzo have been precisely handcrafted from the finest raw materials, selected for their durability and refined character. To ensure the beauty of your DEXterra product, we suggest the same common sense care approach that you would with fine wood furniture. The surface is sealed with a high quality penetrating sealer, just like sealers used on natural stone. The Countertops are also waxed with a blend of carnauba and beeswax to help protect and bring out a deep shine. Maintenance of these protective materials will help protect your countertop. For cleaning, use a mild soap and water or a non-abrasive household cleaner such as Simple Green available at most grocery and hardware stores nationwide. Every 3-4 months polish your product with the wax recommended by DEX (Tre-Wax Clear Paste Wax, can be purchased/ordered any Ace Hardware store or you can go to the website www.trewax.com to order it directly or find a retailer near you that will order/carry it). The wax is designed for use as a protectant on stone products and will do a good job of repelling most household liquids. Continual maintenance of the wax will insure a lifetime of beauty and service from your DEX countertop. On an annual basis, we recommend resealing your countertop. We recommend using Aquamix, prosolve sealer, which can be applied easily with a soft cloth and buffed with dry cloth. Follow directions on the container for application. Aquamix can be purchased at many home improvement stores, tile showrooms, or by contacting Aquamix direct at www.aquamix.com.
